

HOW TO Change to Desktop Site on Mobile Device

QUICK REFERENCE GUIDE

How to Change to Desktop Site on Mobile Device

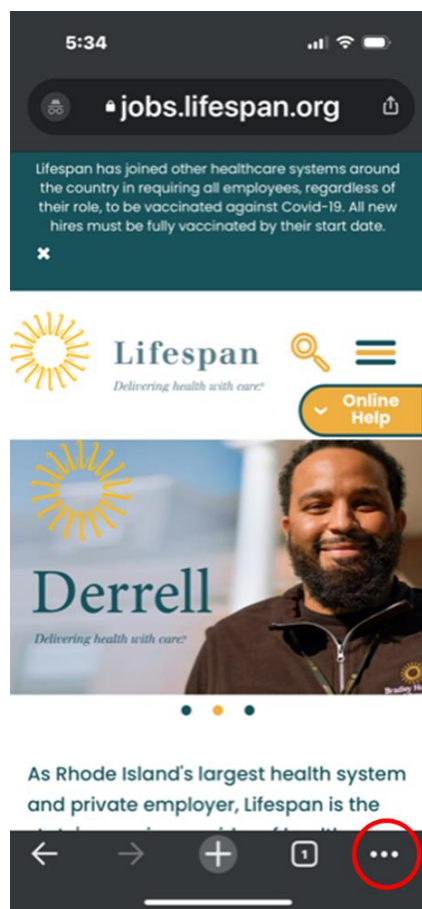

Below are instructions to assist external candidates with changing their mobile browser settings to view the Lifespan career site in the desktop version. Changing the setting will not change the way the pages are displayed, but it is intended to improve any buffering issues candidates may encounter when attempting to register, login or apply.

Navigating to the browser settings and making this change may differ by browser. The instructions below include Google Chrome and Safari on an iPhone and Google Chrome on an Android device:

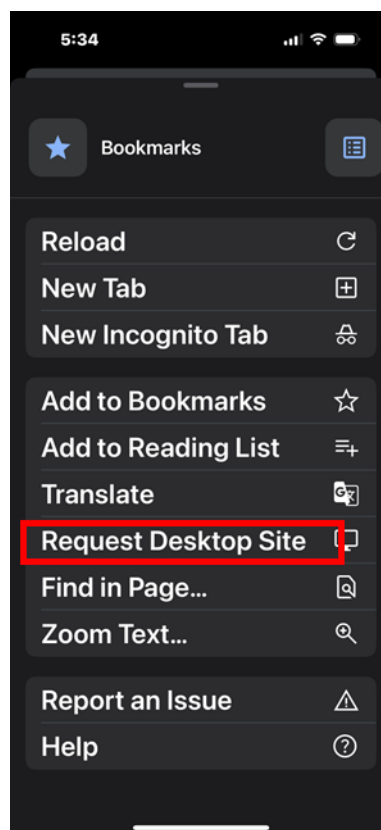

From any browser, on any mobile device, navigate to jobs.lifespan.org.

Using the Google Chrome browser (iPhone):

Step 1: Click on the three dots on the bottom right-hand corner of the screen

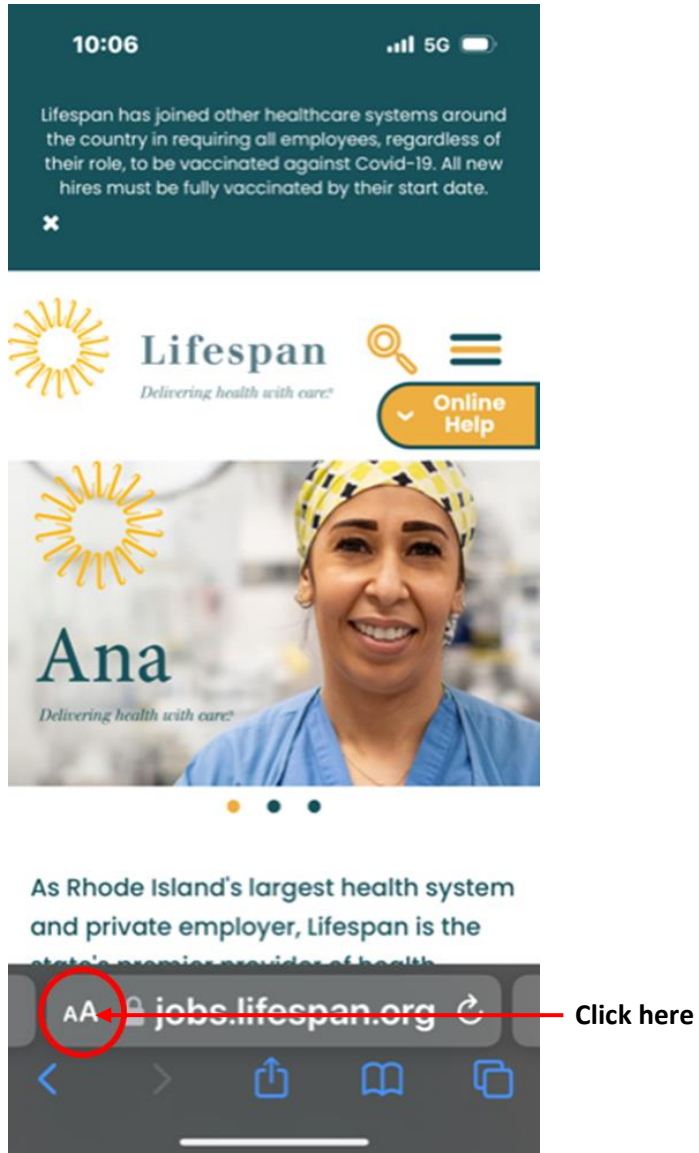

Step 2: Select 'Request Desktop Site.' The browser will now display the desktop version and the candidate can navigate through the job search and application process.

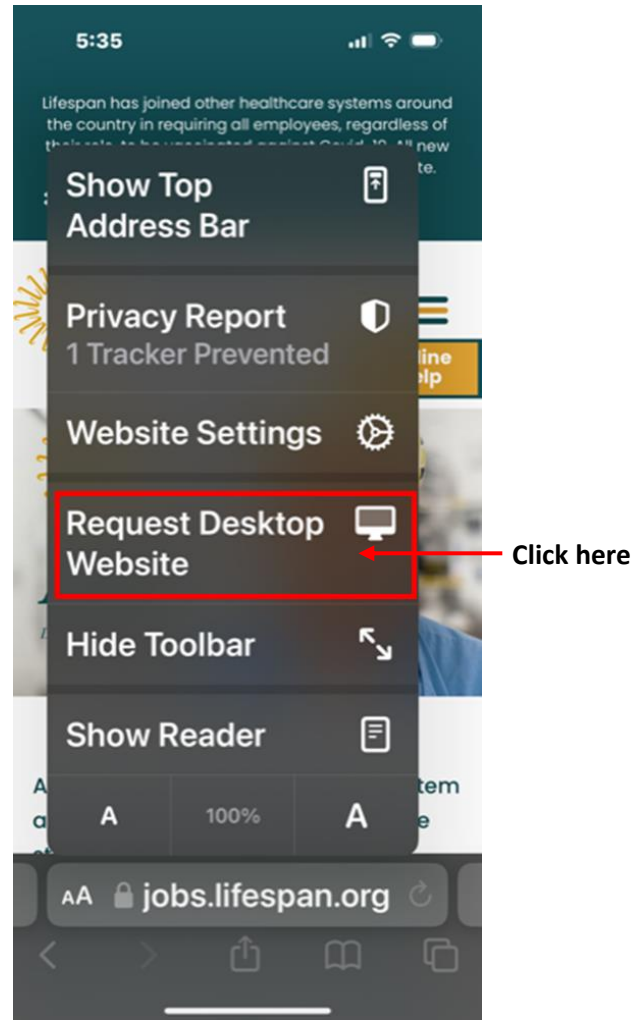

Using the Safari browser (iPhone):

Step 1: Click on the AA icon on the lefthand side of the search bar at the bottom of the screen.

Step 2: Select 'Request Desktop Site.' The browser will now display the desktop version, and the candidate can navigate through the job search and application process.

Using the Google Chrome browser (Android):

Step 1: Click on the three dots on the top right corner of the browser window.

Step 2: Select 'Desktop Site' from the menu. The browser will now display the desktop version and the candidate can navigate through the job search and application process.
